SURYA S

Software Engineer | Full-Stack Developer (React.js, Node.js, TypeScript, Cloud & NoSQL)

Coimbatore, India | suryamca99@gmail.com | +919791902508

LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Performance-driven Full-Stack Software Engineer with 3.5+ years of experience engineering scalable, cloud-integrated web platforms and microservices. Proficient in modern JavaScript/TypeScript ecosystems across frontend (React.js, Next.js) and backend architectures (Node.js, Express.js, Firebase APIs). Hands-on expertise in architecting relational and NoSQL data layers (MongoDB, Firebase Firestore/Realtime Database, MySQL) and integrating Firebase Storage for secure asset distribution. Proven track record in boosting Core Web Vitals, slashing latency via real-time sockets, and delivering enterprise solutions within Agile CI/CD delivery lifecycles.

TECHNICAL SKILLS

Frontend Technologies: React.js, Next.js (App/Pages Router), TypeScript, JavaScript (ES6+), HTML5, CSS3.

Architecture & Concepts: SSR, SSG, SPA, Component-Driven Design, Responsive Web Design, Cross-Browser Compatibility, Microservices.

UI & Styling Libraries: Tailwind CSS, Shadcn UI, Material UI, Chakra UI, Bootstrap.

State & Data: Redux Toolkit, React Query (TanStack), Context API, SWR, RESTful APIs.

Backend & Cloud Services: Node.js, Express.js, Firebase API, RESTful Web Services, JWT Authentication, RBAC, WebSockets, SignalR.

Databases & Cloud Storage: Firebase NoSQL (Cloud Firestore / Realtime DB), Firebase Cloud Storage, MongoDB, PostgreSQL, MySQL, SQLite, Prisma ORM, Knex.js.

Performance & Tooling: Core Web Vitals optimization, Code Splitting, Dynamic Imports, Git, GitHub, Postman, Headless CMS (Strapi, Sanity).

Cloud & DevOps: AWS (EC2, S3), Docker, GitHub Actions (CI/CD Pipelines), PM2, Vercel, Netlify, Linux Server Administration.

AI & Developer Productivity: GitHub Copilot, Cursor AI, LLM-assisted debugging & code refactoring, Rapid UI prototyping (Figma AI, v0), Prompt Engineering for test generation.

PROFESSIONAL EXPERIENCE

Ticket9 *– Coimbatore, India*

Full-Stack Developer *| Jun 2026 – Present*

- *Built scalable web apps with* ***Next.js****,* ***TypeScript****, and* ***Node/Express****, integrating* ***Firebase Cloud Tasks*** *for background queue processing.*
- *Designed* ***Firebase NoSQL*** *schema with targeted* ***query indexing*** *to reduce database latency and lower operational read/write costs.*
- *Implemented secure* ***Firebase Authentication*** *and* ***RBAC*** *middleware alongside* ***Cloud Storage*** *for automated asset management.*

Pranati Technologies *- Chennai, India*

Software Engineer (Full-Stack Developer) *| Oct 2023 – Mar 2026*

- *Engineered and scaled enterprise web applications using Next.js (SSR/SSG), React.js, and TypeScript, improving user engagement and organic SEO reach.*
- *Engineered* ***Next.js/React*** *web apps, boosting performance scores by 35%+ and using* ***Cloud Storage*** *for real-time asset uploads.*
- *Implemented secure token-based authentication workflows using JWT and dynamic Role-Based Access Control (RBAC) to enforce strict enterprise data governance*
- *Configured automated CI/CD pipelines via GitHub Actions and Docker containers for zero-downtime releases on staging and production environments*
- *Collaborated closely with cross-functional Agile engineering, QA, and product design squads in daily scrums and code review sessions*

KEY PROJECTS

Monument Bookings - Multi-Gateway Booking & Management Platform

Tech Stack: Next.js, Node.js, TypeScript, Firebase NoSQL (Firestore), Stripe, PhonePe, Razorpay, PayWay, Tailwind CSS

- Architected a multi-gateway payment orchestration system integrating Stripe, PhonePe, Razorpay, and PayWay for high-volume ticket booking transactions.
- Built secure webhook listeners in Node.js to handle asynchronous payment lifecycle events, signature verification, and automated transaction reconciliation.
- Designed a scalable Firebase NoSQL database schema to manage real-time inventory, visitor check-ins, and concurrent booking slots with low latency.

- Engineered responsive management dashboards with Next.js and Tailwind CSS for real-time ticket validation and transaction telemetry.

Magma CMS - Multi-Tenant Headless Platform

Tech Stack: Next.js, React, TypeScript, Node.js, PostgreSQL, Knex.js, Firebase Cloud Storage, JWT, RBAC

- Architected a multi-tenant CMS platform supporting isolated database routing per client and dynamic permission enforcement.
- Integrated **Firebase Cloud Storage** and custom upload pipelines for secure, low-latency digital asset management across client spaces.
- Built a high-performance content delivery API and responsive Next.js admin dashboard utilizing React Query and server-side cache invalidation.

Member Management System

Tech Stack: Vite.js, React/TypeScript, .NET Core, Firebase NoSQL, Tailwind CSS, SignalR

- Implemented core billing, subscription tracking, and member renewal modules backed by **Firebase NoSQL (Firestore)** for high-concurrency member state queries.
- Built a real-time messaging engine leveraging SignalR supporting 1,000+ concurrent active sessions with low latency.
- Designed administrative control dashboards with audit logging, automated renewal webhooks, and granular RBAC protections.

IPTV Web & Media Platform

Tech Stack: React.js, TypeScript, Node.js, .NET, MySQL, Firebase APIs, SignalR

- Developed live streaming synchronization feeds and VOD catalog navigation with real-time push notifications via SignalR.
- Integrated **Firebase REST APIs** for dynamic configuration, remote channel metadata synchronization, and client-side state persistence.
- Enforced JWT-protected playback routes and cross-browser responsive layouts to deliver continuous high-definition playback across devices.

EDUCATION

Master of Computer Applications (MCA) - CGPA: 8.56,

Erode Sengunthar Engineering College, Anna University.
